Mouse TMAO(Trimethylamine-N-oxide) ELISA Kit EBT-ELK0789

Artikelname	Mouse TMAO(Trimethylamine-N-oxide) ELISA Kit
Artikelnummer	EBT-ELK0789
Hersteller Artikelnummer	ELK0789
Alternativnummer	EBT-ELK0789-96, EBT-ELK0789-48, EBT-ELK0789-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Mouse
Konzentration	10 µmol/L
Detektionsbereich	0.16-10 µmol/L
Sensitivitaet	0.067 µmol/L
Proben	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Immunology, Innate Immunity, Complement, Alternative Pathway, Immunology, Innate Immunity, Complement, Other. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse TMAO. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse TMAO. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse TMAO, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse TMAO in the samples is then determined by comparing the OD of the samples to the standard curve
