Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 1.5h. Research Area: Signal transduction,CD & Adhesion molecule,Tumor immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse VEGFR2, and the Mouse VEGFR2 standard plate wells that pre-coated using protein-related techniques are provided separately. Standard/Sample Diluent Buffer or samples are added to the appropriate microtiter plate wells ,then added a HRP-conjugated antibody specific to Mouse VEGFR2. After TMB substrate solution is added, only those wells that contain Mouse VEGFR2 and HRP-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse VEGFR2 in the samples is then determined by comparing the OD of the samples to the standard curve
