EasyStep Human sTFR(Soluble Transferrin Receptor) ELISA Kit EBT-ELK092ES

Artikelname	EasyStep Human sTFR(Soluble Transferrin Receptor) ELISA Kit
Artikelnummer	EBT-ELK092ES
Hersteller Artikelnummer	ELK092ES
Alternativnummer	EBT-ELK092ES-96, EBT-ELK092ES-48, EBT-ELK092ES-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	5000 ng/mL
Detektionsbereich	78.13-5000 ng/mL
Sensitivitaet	17.55 ng/mL
Proben	Serum, plasma

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 1.5h. Research Area: Signal transduction, CD & Adhesion molecule, Tumor immunity, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human sTFR, and the Human sTFR standard plate wells that pre-coated using protein-related techniques are provided separately. Standard/Sample Diluent Buffer or samples are added to the appropriate microtiter plate wells ,then added a HRP-conjugated antibody specific to Human sTFR. After TMB substrate solution is added, only those wells that contain Human sTFR and HRP-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human sTFR in the samples is then determined by comparing the OD of the samples to the standard curve
