## Product Datasheet

### Zebrafish EPI(Epinephrine/Adrenaline) ELISA Kit EBT-ELK0957

Artikelname	Zebrafish EPI(Epinephrine/Adrenaline) ELISA Kit
Artikelnummer	EBT-ELK0957
Hersteller Artikelnummer	ELK0957
Alternativnummer	EBT-ELK0957-96, EBT-ELK0957-48, EBT-ELK0957-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Zebrafish
Konzentration	2000 pg/mL
Detektionsbereich	31.25-2000 pg/mL
Sensitivitaet	9.31 pg/mL
Proben	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Metabolic pathway, Infection immunity, Neuro science, Hormone metabolism, . Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Zebrafish EPI. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Zebrafish EPI. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Zebrafish EPI in the samples is then determined by comparing the OD of the samples to the standard curve
