Product Datasheet

Human anti-21-OH Ab(anti 21-hydroxylase antibody) ELISA Kit EBT-ELK10071

Artikelname	Human anti-21-OH Ab(anti 21-hydroxylase antibody) ELISA Kit
Artikelnummer	EBT-ELK10071
Hersteller Artikelnummer	ELK10071
Alternativnummer	EBT-ELK10071-96, EBT-ELK10071-48, EBT-ELK10071-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.189 ng/mL
Proben	serum, plasma, Tissue homogenates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Immunology. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human 21-OH Ab. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human 21-OH Ab. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human 21-OH Ab, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human 21-OH Ab in the samples is then determined by comparing the OD of the samples to the standard curve
