Product Datasheet

Human VE-Cadherin(Vascular Endothelial Cadherin) ELISA Kit EBT-ELK10194

Artikelname	Human VE-Cadherin(Vascular Endothelial Cadherin) ELISA Kit
Artikelnummer	EBT-ELK10194
Hersteller Artikelnummer	ELK10194
Alternativnummer	EBT-ELK10194-96, EBT-ELK10194-48, EBT-ELK10194-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	200 ng/mL
Detektionsbereich	3.13-200 ng/mL
Sensitivitaet	1.21 ng/mL
UniProt	P33151
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule, Tumor immunity, Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human VE-Cadherin. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human VE-Cadherin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human VE-Cadherin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human VE-Cadherin in the samples is then determined by comparing the OD of the samples to the standard curve
