Product Datasheet

Human C1qR1(Complement Component 1, Q Receptor) ELISA Kit EBT-ELK10259

Artikelname	Human C1qR1(Complement Component 1, Q Receptor) ELISA Kit
Artikelnummer	EBT-ELK10259
Hersteller Artikelnummer	ELK10259
Alternativnummer	EBT-ELK10259-96, EBT-ELK10259-48, EBT-ELK10259-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	200 ng/mL
Detektionsbereich	3.13-200 ng/mL
Sensitivitaet	1.29 ng/mL
UniProt	Q9NPY3
Proben	serum, plasma and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,CD & Adhesion molecule,Apoptosis,Infection immunity,Immune molecule,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human C1qR1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human C1qR1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human C1qR1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human C1qR1 in the samples is then determined by comparing the OD of the samples to the standard curve
