Product Datasheet

Mouse TGF β 1(Transforming Growth Factor Beta Induced Protein) Microsample ELISA Kit EBT-ELK10481MS

Artikelname	Mouse TGF β 1(Transforming Growth Factor Beta Induced Protein) Microsample ELISA Kit
Artikelnummer	EBT-ELK10481MS
Hersteller Artikelnummer	ELK10481MS
Alternativnummer	EBT-ELK10481MS-96, EBT-ELK10481MS-48, EBT-ELK10481MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Mouse
Konzentration	40 ng/mL
Detektionsbereich	0.63-40 ng/mL
Sensitivitaet	0.21 ng/mL
UniProt	P82198
Proben	Serum, plasma and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse TGF β 1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse TGF β 1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse TGF β 1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Mouse TGF β 1 in the samples is then determined by comparing the OD of the samples to the standard curve
