Sheep INS(Insulin) ELISA Kit EBT-ELK10983

Artikelname	Sheep INS(Insulin) ELISA Kit
Artikelnummer	EBT-ELK10983
Hersteller Artikelnummer	ELK10983
Alternativnummer	EBT-ELK10983-96, EBT-ELK10983-96X5, EBT-ELK10983-48
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Sheep
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.064 ng/mL
UniProt	P01318
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Endocrinology, Hormone metabolism, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Sheep INS. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Sheep INS. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Sheep INS, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Sheep INS in the samples is then determined by comparing the OD of the samples to the standard curve
