Product Datasheet

Human sTFR(Soluble Transferrin Receptor) ELISA Kit EBT-ELK10988

Artikelname	Human sTFR(Soluble Transferrin Receptor) ELISA Kit
Artikelnummer	EBT-ELK10988
Hersteller Artikelnummer	ELK10988
Alternativnummer	EBT-ELK10988-96, EBT-ELK10988-96X5, EBT-ELK10988-48
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	300 ng/mL
Detektionsbereich	4.69-300 ng/mL
Sensitivitaet	1.57 ng/mL
Proben	serum, plasma, tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, CD & Adhesion molecule, Tumor immunity, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human sTFR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human sTFR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human sTFR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human sTFR in the samples is then determined by comparing the OD of the samples to the standard curve
