Product Datasheet

Cattle bLg(Beta-Lactoglobulin) ELISA Kit EBT-ELK11127

Artikelname	Cattle bLg(Beta-Lactoglobulin) ELISA Kit
Artikelnummer	EBT-ELK11127
Hersteller Artikelnummer	ELK11127
Alternativnummer	EBT-ELK11127-96, EBT-ELK11127-48, EBT-ELK11127-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Bovine
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.067 ng/mL
Proben	serum, plasma, tissue homogenates, cell lysates, milk, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Infection immunity, Reproductive science, Human gene deletion, Nutrition metabolism, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle bLg. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle bLg. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle bLg, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Cattle bLg in the samples is then determined by comparing the OD of the samples to the standard curve
