Rat HPX(Hemopexin) ELISA Kit EBT-ELK11151

Artikelname	Rat HPX(Hemopexin) ELISA Kit
Artikelnummer	EBT-ELK11151
Hersteller Artikelnummer	ELK11151
Alternativnummer	EBT-ELK11151-96, EBT-ELK11151-48, EBT-ELK11151-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Konzentration	100 µg/mL
Detektionsbereich	1.56-100 µg/mL
Sensitivitaet	0.62 µg/mL
UniProt	P20059
Proben	Serum, plasma and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Infection immunity, Hematology, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat HPX. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat HPX. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat HPX, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat HPX in the samples is then determined by comparing the OD of the samples to the standard curve
