## Product Datasheet

### Human MIP1a(Macrophage Inflammatory Protein 1 Alpha) Microsample ELISA Kit EBT-ELK1115MS

Artikelname	Human MIP1a(Macrophage Inflammatory Protein 1 Alpha) Microsample ELISA Kit
Artikelnummer	EBT-ELK1115MS
Hersteller Artikelnummer	ELK1115MS
Alternativnummer	EBT-ELK1115MS-96, EBT-ELK1115MS-48, EBT-ELK1115MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	1000 pg/mL
Detektionsbereich	15.63-1000 pg/mL
Sensitivitaet	6.9 pg/mL
UniProt	<a href="#">P10147</a>
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human MIP1a. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human MIP1a. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human MIP1a, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Human MIP1a in the samples is then determined by comparing the OD of the samples to the standard curve
