### Human VD(Vitamin D) ELISA Kit EBT-ELK11264

Artikelname	Human VD(Vitamin D) ELISA Kit
Artikelnummer	EBT-ELK11264
Hersteller Artikelnummer	ELK11264
Alternativnummer	EBT-ELK11264-96, EBT-ELK11264-48, EBT-ELK11264-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	400 ng/mL
Detektionsbereich	6.25-400 ng/mL
Sensitivitaet	2.19 ng/mL
Proben	Serum, plasma and other biological fluids

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Metabonomics. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human VD. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human VD. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human VD in the samples is then determined by comparing the OD of the samples to the standard curve
