## Product Datasheet

### Human TSH(Thyroid Stimulating Hormone) Microsample ELISA Kit EBT-ELK1163MS

Artikelname	Human TSH(Thyroid Stimulating Hormone) Microsample ELISA Kit
Artikelnummer	EBT-ELK1163MS
Hersteller Artikelnummer	ELK1163MS
Alternativnummer	EBT-ELK1163MS-96, EBT-ELK1163MS-48, EBT-ELK1163MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 uIU/mL
Detektionsbereich	0.32-20 uIU/mL
Sensitivitaet	0.121 uIU/mL
Proben	Serum

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Endocrinology, Hormone metabolism,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human TSH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human TSH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human TSH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human TSH in the samples is then determined by comparing the OD of the samples to the standard curve
