## Product Datasheet

### Human TGF $\alpha$ (Transforming Growth Factor Alpha) ELISA Kit EBT-ELK1184

Artikelname	Human TGF $\alpha$ (Transforming Growth Factor Alpha) ELISA Kit
Artikelnummer	EBT-ELK1184
Hersteller Artikelnummer	ELK1184
Alternativnummer	EBT-ELK1184-96, EBT-ELK1184-48, EBT-ELK1184-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	1000 pg/mL
Detektionsbereich	15.63-1000 pg/mL
Sensitivitaet	6 pg/mL
UniProt	<a href="#">P01135</a>
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung	<p>Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Tumor immunity, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human TGF<math>\alpha</math>. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human TGF<math>\alpha</math>. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human TGF<math>\alpha</math>, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm <math>\pm</math> 10nm. The concentration of Human TGF<math>\alpha</math> in the samples is then determined by comparing the OD of the samples to the standard curve</p>
