Product Datasheet

Human VEGFC(Vascular Endothelial Growth Factor C) ELISA Kit EBT-ELK1194

Artikelname	Human VEGFC(Vascular Endothelial Growth Factor C) ELISA Kit
Artikelnummer	EBT-ELK1194
Hersteller Artikelnummer	ELK1194
Alternativnummer	EBT-ELK1194-96, EBT-ELK1194-48, EBT-ELK1194-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	5000 pg/mL
Detektionsbereich	78.13-5000 pg/mL
Sensitivitaet	33 pg/mL
UniProt	P49767
Proben	serum, platelet-poor plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Tumor immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human VEGFC. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human VEGFC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human VEGFC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human VEGFC in the samples is then determined by comparing the OD of the samples to the standard curve
