## Product Datasheet

### Human NMB(Neuromedin B) ELISA Kit EBT-ELK1629

Artikelname	Human NMB(Neuromedin B) ELISA Kit
Artikelnummer	EBT-ELK1629
Hersteller Artikelnummer	ELK1629
Alternativnummer	EBT-ELK1629-96, EBT-ELK1629-48, EBT-ELK1629-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10000 pg/mL
Detektionsbereich	156.25-10000 pg/mL
Sensitivitaet	48.1 pg/mL
UniProt	<a href="#">P08949</a>
Proben	serum, plasma and other biological fluids

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Signal transduction, Endocrinology, Neuroscience, Gastroenterology, Hormone metabolism,. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human NMB. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human NMB. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human NMB in the samples is then determined by comparing the OD of the samples to the standard curve
