Product Datasheet

Human PKCz(Protein Kinase C Zeta) ELISA Kit EBT-ELK1680

Artikelname	Human PKCz(Protein Kinase C Zeta) ELISA Kit
Artikelnummer	EBT-ELK1680
Hersteller Artikelnummer	ELK1680
Alternativnummer	EBT-ELK1680-96, EBT-ELK1680-48, EBT-ELK1680-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.125 ng/mL
UniProt	Q05513
Proben	Tissue homogenates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Enzyme & Kinase, Neuro science,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human PKC ζ . Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human PKC ζ . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human PKC ζ , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Human PKC ζ in the samples is then determined by comparing the OD of the samples to the standard curve
