Product Datasheet

Human F13A1(Coagulation Factor XIII A1 Polypeptide) ELISA Kit EBT-ELK1762

Artikelname	Human F13A1(Coagulation Factor XIII A1 Polypeptide) ELISA Kit
Artikelnummer	EBT-ELK1762
Hersteller Artikelnummer	ELK1762
Alternativnummer	EBT-ELK1762-96, EBT-ELK1762-48, EBT-ELK1762-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	12 ng/mL
Detektionsbereich	0.19-12 ng/mL
Sensitivitaet	0.071 ng/mL
Proben	plasma

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Metabolic pathway, Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human F13A1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human F13A1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human F13A1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human F13A1 in the samples is then determined by comparing the OD of the samples to the standard curve
