Product Datasheet

Human SPB(Surfactant Associated Protein B) ELISA Kit EBT-ELK1771

Artikelname	Human SPB(Surfactant Associated Protein B) ELISA Kit
Artikelnummer	EBT-ELK1771
Hersteller Artikelnummer	ELK1771
Alternativnummer	EBT-ELK1771-96, EBT-ELK1771-48, EBT-ELK1771-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	100 ng/mL
Detektionsbereich	1.57-100 ng/mL
Sensitivitaet	0.6 ng/mL
UniProt	P07988
Proben	serum, plasma, lung lavage fluid, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Tumor immunity, Infection immunity, Pulmonology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SPB. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SPB. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SPB, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human SPB in the samples is then determined by comparing the OD of the samples to the standard curve
