Product Datasheet

Human CR(Calretinin) ELISA Kit EBT-ELK1866

Artikelname	Human CR(Calretinin) ELISA Kit
Artikelnummer	EBT-ELK1866
Hersteller Artikelnummer	ELK1866
Alternativnummer	EBT-ELK1866-96, EBT-ELK1866-48, EBT-ELK1866-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.053 ng/mL
UniProt	P22676
Proben	serum, plasma, tissue homogenates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Tumor immunity, Neuro science,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human CR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human CR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human CR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human CR in the samples is then determined by comparing the OD of the samples to the standard curve
