Product Datasheet

Human NAGase(N-Acetyl Beta-D-Glucosaminidase) ELISA Kit EBT-ELK1917

Artikelname	Human NAGase(N-Acetyl Beta-D-Glucosaminidase) ELISA Kit
Artikelnummer	EBT-ELK1917
Hersteller Artikelnummer	ELK1917
Alternativnummer	EBT-ELK1917-96, EBT-ELK1917-48, EBT-ELK1917-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	100 ng/mL
Detektionsbereich	1.57-100 ng/mL
Sensitivitaet	0.54 ng/mL
Proben	Urine

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Enzyme & Kinase, Kidney biomarker, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human NAGase. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human NAGase. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human NAGase, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human NAGase in the samples is then determined by comparing the OD of the samples to the standard curve
