Product Datasheet

Human MRC1(Mannose Receptor C Type 1) ELISA Kit EBT-ELK2065

Artikelname	Human MRC1(Mannose Receptor C Type 1) ELISA Kit
Artikelnummer	EBT-ELK2065
Hersteller Artikelnummer	ELK2065
Alternativnummer	EBT-ELK2065-96, EBT-ELK2065-48, EBT-ELK2065-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.116 ng/mL
UniProt	P22897
Proben	Serum, plasma, tissue homogenates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human MRC1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human MRC1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human MRC1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human MRC1 in the samples is then determined by comparing the OD of the samples to the standard curve
