Human MLZE(Melanoma Derived Leucine Zipper Extra Nuclear Factor) ELISA Kit EBT-ELK2133

Artikelname	Human MLZE(Melanoma Derived Leucine Zipper Extra Nuclear Factor) ELISA Kit
Artikelnummer	EBT-ELK2133
Hersteller Artikelnummer	ELK2133
Alternativnummer	EBT-ELK2133-96, EBT-ELK2133-48, EBT-ELK2133-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.068 ng/mL
UniProt	Q9BYG8
Proben	Tissue homogenates and other biological fluids.

Anwendungsbeschreibung	<p>Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Tumor immunity, Dermatology, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human MLZE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human MLZE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human MLZE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human MLZE in the samples is then determined by comparing the OD of the samples to the standard curve</p>
