Product Datasheet

Mouse CTNNb1(Catenin Beta 1) Microsample ELISA Kit EBT-ELK2136MS

Artikelname	Mouse CTNNb1(Catenin Beta 1) Microsample ELISA Kit
Artikelnummer	EBT-ELK2136MS
Hersteller Artikelnummer	ELK2136MS
Alternativnummer	EBT-ELK2136MS-96, EBT-ELK2136MS-48, EBT-ELK2136MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Mouse
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.057 ng/mL
UniProt	Q02248
Proben	tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Tumor immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse CTNNb1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse CTNNb1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse CTNNb1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse CTNNb1 in the samples is then determined by comparing the OD of the samples to the standard curve
