Product Datasheet

Human IgG2(Immunoglobulin G2) ELISA Kit EBT-ELK2143

Artikelname	Human IgG2(Immunoglobulin G2) ELISA Kit
Artikelnummer	EBT-ELK2143
Hersteller Artikelnummer	ELK2143
Alternativnummer	EBT-ELK2143-96, EBT-ELK2143-48, EBT-ELK2143-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	100 µg/mL
Detektionsbereich	1.57-100 µg/mL
Sensitivitaet	0.51 µg/mL
UniProt	P01859
Proben	Serum, plasma and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Infection immunity, Immune molecule,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human IgG2. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human IgG2. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human IgG2, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human IgG2 in the samples is then determined by comparing the OD of the samples to the standard curve
