Product Datasheet

Human F11(Coagulation Factor XI) ELISA Kit EBT-ELK2217

Artikelname	Human F11(Coagulation Factor XI) ELISA Kit
Artikelnummer	EBT-ELK2217
Hersteller Artikelnummer	ELK2217
Alternativnummer	EBT-ELK2217-96, EBT-ELK2217-48, EBT-ELK2217-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	40 ng/mL
Detektionsbereich	0.63-40 ng/mL
Sensitivitaet	0.216 ng/mL
UniProt	P03951
Proben	Plasma.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human F11. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human F11. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human F11, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human F11 in the samples is then determined by comparing the OD of the samples to the standard curve
