Product Datasheet

Human sIL-6R(SolubleInterleukin 6 Receptor) ELISA Kit EBT-ELK2247

Artikelname	Human sIL-6R(SolubleInterleukin 6 Receptor) ELISA Kit
Artikelnummer	EBT-ELK2247
Hersteller Artikelnummer	ELK2247
Alternativnummer	EBT-ELK2247-96, EBT-ELK2247-48, EBT-ELK2247-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	120 ng/mL
Detektionsbereich	1.88-120 ng/mL
Sensitivitaet	0.81 ng/mL
Proben	Serum, plasma, tissue homogenates, urine and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, CD & Adhesion molecule, Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human sIL-6R. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human sIL-6R. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human sIL-6R, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human sIL-6R in the samples is then determined by comparing the OD of the samples to the standard curve
