Product Datasheet

Rat TGFa(Transforming Growth Factor Alpha) Microsample ELISA Kit EBT-ELK2464MS

Artikelname	Rat TGFa(Transforming Growth Factor Alpha) Microsample ELISA Kit
Artikelnummer	EBT-ELK2464MS
Hersteller Artikelnummer	ELK2464MS
Alternativnummer	EBT-ELK2464MS-96, EBT-ELK2464MS-48, EBT-ELK2464MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Konzentration	500 pg/mL
Detektionsbereich	7.82-500 pg/mL
Sensitivitaet	3.2 pg/mL
UniProt	P01134
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Tumor immunity, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat TGF α . Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat TGF α . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat TGF α , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Rat TGF α in the samples is then determined by comparing the OD of the samples to the standard curve
