## Product Datasheet

### Mouse TGF $\alpha$ (Transforming Growth Factor Alpha) ELISA Kit EBT-ELK2465

Artikelname	Mouse TGF $\alpha$ (Transforming Growth Factor Alpha) ELISA Kit
Artikelnummer	EBT-ELK2465
Hersteller Artikelnummer	ELK2465
Alternativnummer	EBT-ELK2465-96, EBT-ELK2465-48, EBT-ELK2465-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Mouse
Konzentration	500 pg/mL
Detektionsbereich	7.82-500 pg/mL
Sensitivität	3.4 pg/mL
UniProt	<a href="#">P48030</a>
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Tumor immunity, Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse TGF $\alpha$ . Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse TGF $\alpha$ . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse TGF $\alpha$ , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Mouse TGF $\alpha$  in the samples is then determined by comparing the OD of the samples to the standard curve
