Mouse EG-VEGF(Endocrine Gland Derived Vascular Endothelial Growth Factor) ELISA Kit EBT-ELK2479

Artikelname	Mouse EG-VEGF(Endocrine Gland Derived Vascular Endothelial Growth Factor) ELISA Kit
Artikelnummer	EBT-ELK2479
Hersteller Artikelnummer	ELK2479
Alternativnummer	EBT-ELK2479-96, EBT-ELK2479-48, EBT-ELK2479-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Mouse
Konzentration	1000 pg/mL
Detektionsbereich	15.63-1000 pg/mL
Sensitivitaet	5.8 pg/mL
UniProt	Q14A28
Proben	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung	Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Tumor immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse EG-VEGF. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse EG-VEGF. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse EG-VEGF, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse EG-VEGF in the samples is then determined by comparing the OD of the samples to the standard curve
