Product Datasheet

Human PDGFRa(Platelet Derived Growth Factor Receptor Alpha) ELISA Kit EBT-ELK2768

Artikelname	Human PDGFRa(Platelet Derived Growth Factor Receptor Alpha) ELISA Kit
Artikelnummer	EBT-ELK2768
Hersteller Artikelnummer	ELK2768
Alternativnummer	EBT-ELK2768-96, EBT-ELK2768-48, EBT-ELK2768-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.062 ng/mL
UniProt	P16234
Proben	Tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Infection immunity, Hematology, Kidney biomarker, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human PDGFRa. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human PDGFRa. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human PDGFRa, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human PDGFRa in the samples is then determined by comparing the OD of the samples to the standard curve
