Product Datasheet

Human FcγR3B(Fc Fragment Of IgG Low Affinity IIIb Receptor) ELISA Kit EBT-ELK2798

Artikelname	Human FcγR3B(Fc Fragment Of IgG Low Affinity IIIb Receptor) ELISA Kit
Artikelnummer	EBT-ELK2798
Hersteller Artikelnummer	ELK2798
Alternativnummer	EBT-ELK2798-96, EBT-ELK2798-48, EBT-ELK2798-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivität	0.131 ng/mL
UniProt	O75015
Proben	Serum, plasma, tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human FcgR3B. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human FcgR3B. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human FcgR3B, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human FcgR3B in the samples is then determined by comparing the OD of the samples to the standard curve
