Product Datasheet

Human SPON1(Spondin 1) ELISA Kit EBT-ELK3318

Artikelname	Human SPON1(Spondin 1) ELISA Kit
Artikelnummer	EBT-ELK3318
Hersteller Artikelnummer	ELK3318
Alternativnummer	EBT-ELK3318-96, EBT-ELK3318-48, EBT-ELK3318-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	40 ng/mL
Detektionsbereich	0.63-40 ng/mL
Sensitivitaet	0.236 ng/mL
UniProt	Q9HCB6
Proben	serum, plasma and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SPON1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SPON1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SPON1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human SPON1 in the samples is then determined by comparing the OD of the samples to the standard curve
