## Product Datasheet

### Human IGF1R(Insulin Like Growth Factor 1 Receptor) Microsample ELISA Kit EBT-ELK3396MS

Artikelname	Human IGF1R(Insulin Like Growth Factor 1 Receptor) Microsample ELISA Kit
Artikelnummer	EBT-ELK3396MS
Hersteller Artikelnummer	ELK3396MS
Alternativnummer	EBT-ELK3396MS-96, EBT-ELK3396MS-48, EBT-ELK3396MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.123 ng/mL
UniProt	<a href="#">P08069</a>
Proben	tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Endocrinology, Cardiovascular biology, Hormone metabolism, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human IGF1R. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human IGF1R. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human IGF1R, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human IGF1R in the samples is then determined by comparing the OD of the samples to the standard curve
