Product Datasheet

Human DYSF(Dysferlin) ELISA Kit EBT-ELK3572

Artikelname	Human DYSF(Dysferlin) ELISA Kit
Artikelnummer	EBT-ELK3572
Hersteller Artikelnummer	ELK3572
Alternativnummer	EBT-ELK3572-96, EBT-ELK3572-48, EBT-ELK3572-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	2000 pg/mL
Detektionsbereich	31.25-2000 pg/mL
Sensitivitaet	12.7 pg/mL
UniProt	O75923
Proben	Tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Immune molecule, Neuro science, Bone metabolism,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human DYSF. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human DYSF. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human DYSF, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human DYSF in the samples is then determined by comparing the OD of the samples to the standard curve
