Product Datasheet

Human CELSR2(Cadherin EGF LAG Seven Pass G-Type Receptor 2) ELISA Kit EBT-ELK3576

Artikelname	Human CELSR2(Cadherin EGF LAG Seven Pass G-Type Receptor 2) ELISA Kit
Artikelnummer	EBT-ELK3576
Hersteller Artikelnummer	ELK3576
Alternativnummer	EBT-ELK3576-96, EBT-ELK3576-48, EBT-ELK3576-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.066 ng/mL
UniProt	Q9HCU4
Proben	Tissue homogenates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human CELSR2. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human CELSR2. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human CELSR2, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human CELSR2 in the samples is then determined by comparing the OD of the samples to the standard curve
