Product Datasheet

Mouse BPI(Bactericidal/Permeability Increasing Protein) ELISA Kit EBT-ELK3629

Artikelname	Mouse BPI(Bactericidal/Permeability Increasing Protein) ELISA Kit
Artikelnummer	EBT-ELK3629
Hersteller Artikelnummer	ELK3629
Alternativnummer	EBT-ELK3629-96, EBT-ELK3629-48, EBT-ELK3629-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Mouse
Konzentration	2000 pg/mL
Detektionsbereich	31.25-2000 pg/mL
Sensitivitaet	13.5 pg/mL
UniProt	Q67E05
Proben	serum, plasma and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Infection immunity, Dermatology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse BPI. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse BPI. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse BPI, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse BPI in the samples is then determined by comparing the OD of the samples to the standard curve
