Product Datasheet

Human GPER(G Protein Coupled Estrogen Receptor 1) ELISA Kit EBT-ELK3932

Artikelname	Human GPER(G Protein Coupled Estrogen Receptor 1) ELISA Kit
Artikelnummer	EBT-ELK3932
Hersteller Artikelnummer	ELK3932
Alternativnummer	EBT-ELK3932-96, EBT-ELK3932-48, EBT-ELK3932-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.123 ng/mL
UniProt	Q99527
Proben	serum, plasma, tissue homogenates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human GPER. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human GPER. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human GPER, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human GPER in the samples is then determined by comparing the OD of the samples to the standard curve
