Product Datasheet

Human ERN1(Endoplasmic Reticulum To Nucleus Signalling 1) Microsample ELISA Kit EBT-ELK4393MS

Artikelname	Human ERN1(Endoplasmic Reticulum To Nucleus Signalling 1) Microsample ELISA Kit
Artikelnummer	EBT-ELK4393MS
Hersteller Artikelnummer	ELK4393MS
Alternativnummer	EBT-ELK4393MS-96, EBT-ELK4393MS-48, EBT-ELK4393MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.058 ng/mL
UniProt	O75460
Proben	Serum, plasma, tissue homogenates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Apoptosis,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human ERN1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human ERN1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human ERN1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human ERN1 in the samples is then determined by comparing the OD of the samples to the standard curve
