## Product Datasheet

### Human SHP(Small Heterodimer Partner) ELISA Kit EBT-ELK4427

Artikelname	Human SHP(Small Heterodimer Partner) ELISA Kit
Artikelnummer	EBT-ELK4427
Hersteller Artikelnummer	ELK4427
Alternativnummer	EBT-ELK4427-96, EBT-ELK4427-48, EBT-ELK4427-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.055 ng/mL
UniProt	<a href="#">Q15466</a>
Proben	Tissue homogenates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,Endocrinology,Developmental science,Hormone metabolism,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SHP. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SHP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SHP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human SHP in the samples is then determined by comparing the OD of the samples to the standard curve
