Product Datasheet

Human ICOSLG(Inducible T-Cell Co Stimulator Ligand) ELISA Kit EBT-ELK4470

Artikelname	Human ICOSLG(Inducible T-Cell Co Stimulator Ligand) ELISA Kit
Artikelnummer	EBT-ELK4470
Hersteller Artikelnummer	ELK4470
Alternativnummer	EBT-ELK4470-96, EBT-ELK4470-48, EBT-ELK4470-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.065 ng/mL
UniProt	O75144
Proben	tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Tumor immunity, Infection immunity, Immune molecule, .
Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human ICOSLG. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human ICOSLG. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human ICOSLG, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human ICOSLG in the samples is then determined by comparing the OD of the samples to the standard curve
