### Human bLPH(Beta-Lipotropic Hormone) ELISA Kit EBT-ELK4633

|                          |  |
|--------------------------|--|
| Artikelname              | Human bLPH(Beta-Lipotropic Hormone) ELISA Kit    |
| Artikelnummer            | EBT-ELK4633                                      |
| Hersteller Artikelnummer | ELK4633  |
| Alternativnummer         | EBT-ELK4633-96, EBT-ELK4633-48, EBT-ELK4633-96X5 |
| Hersteller               | ELK Biotechnology                                |
| Kategorie                | Kits/Assays                                      |
| Spezies Reaktivität      | Human  |
| Konzentration            | 500 pg/mL  |
| Detektionsbereich        | 7.82-500 pg/mL                                   |
| Sensitivitaet            | 2.37 pg/mL                                       |
| Proben                   | Serum, plasma and other biological fluids        |

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Metabolic pathway, Endocrinology, Hormone metabolism,. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human bLPH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human bLPH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human bLPH in the samples is then determined by comparing the OD of the samples to the standard curve
