Product Datasheet

Human IL21R(Interleukin 21 Receptor) Microsample ELISA Kit EBT-ELK4659MS

Artikelname	Human IL21R(Interleukin 21 Receptor) Microsample ELISA Kit
Artikelnummer	EBT-ELK4659MS
Hersteller Artikelnummer	ELK4659MS
Alternativnummer	EBT-ELK4659MS-96, EBT-ELK4659MS-48, EBT-ELK4659MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.065 ng/mL
UniProt	Q9HBE5
Proben	Tissue homogenates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Tumor immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human IL21R. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human IL21R. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human IL21R, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human IL21R in the samples is then determined by comparing the OD of the samples to the standard curve
