Product Datasheet

Human OFQ/N(OrphaninFQ/Nociceptin) ELISA Kit EBT-ELK4683

Artikelname	Human OFQ/N(OrphaninFQ/Nociceptin) ELISA Kit
Artikelnummer	EBT-ELK4683
Hersteller Artikelnummer	ELK4683
Alternativnummer	EBT-ELK4683-96, EBT-ELK4683-48, EBT-ELK4683-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.056 ng/mL
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Neuro science,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human OFQ/N. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human OFQ/N. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human OFQ/N, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human OFQ/N in the samples is then determined by comparing the OD of the samples to the standard curve
