Product Datasheet

Human y+LAT1(L-Type Amino Acid Transporter 1) ELISA Kit EBT-ELK4710

Artikelname	Human y+LAT1(L-Type Amino Acid Transporter 1) ELISA Kit
Artikelnummer	EBT-ELK4710
Hersteller Artikelnummer	ELK4710
Alternativnummer	EBT-ELK4710-96, EBT-ELK4710-48, EBT-ELK4710-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.118 ng/mL
UniProt	Q9UM01
Proben	Tissue homogenates, cell lysates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human γ +LAT1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human γ +LAT1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human γ +LAT1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human γ +LAT1 in the samples is then determined by comparing the OD of the samples to the standard curve
