Product Datasheet

Human PDE1A(Phosphodiesterase 1A, Calmodulin Dependent) ELISA Kit EBT-ELK4781

Artikelname	Human PDE1A(Phosphodiesterase 1A, Calmodulin Dependent) ELISA Kit
Artikelnummer	EBT-ELK4781
Hersteller Artikelnummer	ELK4781
Alternativnummer	EBT-ELK4781-96, EBT-ELK4781-48, EBT-ELK4781-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.13 ng/mL
UniProt	P54750
Proben	Tissue homogenates and other biological fluids.

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Enzyme & Kinase,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human PDE1A. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human PDE1A. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human PDE1A, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human PDE1A in the samples is then determined by comparing the OD of the samples to the standard curve
