Human MHCDRb1(Major Histocompatibility Complex Class II DR Beta 1) Microsample ELISA Kit EBT-ELK4799MS

Artikelname	Human MHCDRb1(Major Histocompatibility Complex Class II DR Beta 1) Microsample ELISA Kit
Artikelnummer	EBT-ELK4799MS
Hersteller Artikelnummer	ELK4799MS
Alternativnummer	EBT-ELK4799MS-96, EBT-ELK4799MS-48, EBT-ELK4799MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	8000 pg/mL
Detektionsbereich	125-8000 pg/mL
Sensitivitaet	38 pg/mL
UniProt	P01911
Proben	serum, plasma, tissue homogenates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Tumor immunity, Infection immunity, Immune molecule, Immunodeficiency, Autoimmunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human MHCDRb1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human MHCDRb1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human MHCDRb1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human MHCDRb1 in the samples is then determined by comparing the OD of the samples to the standard curve
