Product Datasheet

Human aCTx(Alpha-Crosslaps) ELISA Kit EBT-ELK4853

Artikelname	Human aCTx(Alpha-Crosslaps) ELISA Kit
Artikelnummer	EBT-ELK4853
Hersteller Artikelnummer	ELK4853
Alternativnummer	EBT-ELK4853-96, EBT-ELK4853-48, EBT-ELK4853-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	5000 pg/mL
Detektionsbereich	78.13-5000 pg/mL
Sensitivitaet	25.7 pg/mL
Proben	serum, plasma, other biological fluids

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Bone metabolism,. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human aCTx. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human aCTx. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human aCTx in the samples is then determined by comparing the OD of the samples to the standard curve
